ELSEVIER

Colloids and Surfaces B: Biointerfaces 3 (1995) 387–389

COLLOIDS AND SURFACES B

Contents

(*Abstracted/indexed in: Chemical Abstracts; Current Contents; Physical, Chemical & Earth Sciences; INSPEC; PASCAL/CNRS*)

Vol. 3 Nos. 1/2

Review

Proteins at liquid interfaces: role of the molten globule state
E. Dickinson (Leeds, UK) and Y. Matsumura (Kyoto, Japan) 1

Biological activities of different triclosan–detergent combinations
V. Kjærheim, S.M. Waaler and G. Rölla (Oslo, Norway) 19

Effects of calcium ions on phospholipid aggregates at subzero temperatures
K.O. Kwon, M. Abe and K. Ogino (Chiba, Japan), M.J. Kim (Seoul, Korea) and H. Ohshima (Tokyo, Japan) 25

A microassay for bacterial adherence to hydroxyapatite
K.M. Schilling, R.G. Carson, C.A. Bosko, G.D. Golikeri, A. Bruinooge and K. Hoyberg (Edgewater, NJ, USA), A.M. Waller and N.P. Hughes (Bebington, UK) 31

On the deposition of phospholipids onto planar supports with the Langmuir–Blodgett technique using factorial experimental design. 3. Optimizing lipid composition for maximal adhesion to chromium substrates
P.-Å. Ohlsson, G. Puu and Å. Sellström (Umeå, Sweden) 39

The surface density gradient of grafted poly(ethylene glycol): preparation, characterization and protein adsorption
Y.S. Lin, V. Hlady and C.-G. Gölander (Salt Lake City, UT, USA) 49

Influence of medium composition on surface properties and aggregation of a *Saccharomyces cerevisiae* strain
N. Mozes and L.L. Schinckus (Louvain-la-Neuve, Belgium), C. Ghommidh and J.-M. Navarro (Montpellier, France) and P.G. Rouxhet (Louvain-la-Neuve, Belgium) 63

Protein separation using affinity binding. 1. Polystyrene core-shell latex as ligand carrier
B. Gebben and G.D.B. van Houwelingen (Arnhem, The Netherlands), W. Zhang, Th. van den Boomgaard and C.A. Smolders (Enschede, The Netherlands) 75

Ethanol-induced leaching of lipopolysaccharides from *E. coli* cell surface inhibits bacteriophage ϕX174 infection
T. Basu and R.K. Poddar (Calcutta, India) 85

Influence of the electric potential of the interface on the adsorption of proteins
M.A. Bos, Z. Shervani, A.C.I. Anusiem, M. Giesbers, W. Norde and J.M. Kleijn (Wageningen, The Netherlands) 91

Surface properties of mixed phospholipid–stearylamine monolayers and their interaction with a non-ionic surfactant (poloxamer)
D. Korner and S. Benita (Jerusalem, Israel), G. Albrecht and A. Baszkin (Châtenay-Malabry, France) 101

Colloidal properties of a microbiologically produced sulphur suspension in comparison to a LaMer sulphur sol
A.J.H. Janssen, A. De Keizer and G. Lettinga (Wageningen, The Netherlands) 111

Streaming potential measurements related to fibrinogen adsorption onto silica capillaries
M. Zembala (Kraków, Poland) and P. Déjardin (Strasbourg, France) 119

Vol. 3 No. 3

Physico-chemical surface properties of rhizobacteria and their adhesion to rice roots
W. Achouak, F. Thomas and T. Heulin (Vandœuvre, France) 131

0927-7765/95/$09.50 © 1995 Elsevier Science B.V. All rights reserved

Critical phenomena in model biological tissues
G. Forgacs (Potsdam, NY, USA), S.A. Newman (Valhalla, NY, USA), Z. Polikova and A.W. Neumann (Toronto, Ont., Canada) 139
Fluid shear induced endothelial cell detachment from modified polystyrene substrata
T.G. van Kooten, J.M. Schakenraad and H.C. van der Mei (Groningen, The Netherlands), A. Dekker (Aachen, Germany), C.J. Kirkpatrick (Mainz, Germany), M. Walter, D. Korzec and J. Engemann (Wuppertal, Germany) and H.J. Busscher (Groningen, The Netherlands) 147
Thermoanalysis of the recrystallization process of melt-homogenized glyceride nanoparticles
B. Siekmann and K. Westesen (Braunschweig, Germany) 159
Evidence for presence of micelle-like protein globules in human saliva
G. Rølla and M. Rykke (Oslo, Norway) 177
Phagocytosis of microspheres with modified surfaces
Y. Urakami, Y. Kasuya and K. Fujimoto (Yokohama, Japan), M. Miyamoto (Tokyo, Japan) and H. Kawaguchi (Yokohama, Japan) 183

Vol. 3 No. 4

Kinetics in microemulsion medium. 2. Hydrolysis of *p*-nitrophenyl phosphate with alkaline phosphatase in w/o microemulsion medium using the surfactant AOT
S. Gupta, L. Mukhopadhyay and S.P. Moulik (Calcutta, India) 191
Surface chemical studies of aging and solvent extraction effects on plasma-treated polystyrene
P.C. Schamberger, J.I. Abes and J.A. Gardella, Jr. (Buffalo, NY, USA) 203
Structural transitions in micellar solutions of Pluronic P-105 and their effect on the conformation of dissolved Cytochrome C: an electron paramagnetic resonance investigation
N. Rapoport and K. Caldwell (Salt Lake City, UT, USA) 217
Adhesion of platelets and neutrophilic granulocytes on glass and FEP teflon during exposure to shear stress in a parallel plate flow chamber system
C.L. Klein, M. Otto, H. Köhler, T.G. van Kooten, W. Sliwa-Tomczok, J. Tomczok and C.J. Kirkpatrick (Mainz, Germany) 229
Platelet adhesion and activation under static and flow conditions
Th. Groth (Berlin, Germany), A. Podias and Y. Missirlis (Patras, Greece) 241
Reconstruction of the stapes superstructure with bioactive ceramics
Ph. Dost, W. Reide, N. Mißfeldt and K. Jahnke (Essen. Germany) 251

Vol. 3 No. 5

Role of bentonites in the prevention of *Saccharomyces cerevisiae* adhesion to solid surfaces
A. Vernhet and M.N. Bellon-Fontaine (Massay, France) 255
Liposome aggregation induced by poly(ethylene glycol). Rapid kinetic studies
A.R. Viguera, A. Alonso and F.M. Goñi (Bilbao, Spain) 263
Two forms of lipase from *Mucor miehei* exhibit a different behavior at the air–water interface
C. Blecker, H. Razafindralambo and M. Paquot (Gembloux, Belgium), V. Cerne (Udine, Italy), G. Lognay and M. Severin (Gembloux, Belgium) 271
The effect of pH and concentration on the surface tension of adsorbed layers of various insulin preparations
F.Y.H. Lin (Ottawa, Ont., Canada), D.Y. Kwok, Z. Policova, W. Zingg and A.W. Neumann (Toronto, Ont., Canada) 281
Study of liposomal drug delivery systems. 1. Surface characterization of steroid loaded MLV liposomes
E.I. Vargha-Butler and E.L. Hurst (Halifax, N.S., Canada) 287
Ellipsometry studies of the effects of surface hydrophobicity on protein adsorption
M. Malmsten (Stockholm, Sweden) 297
To what extent are the passive electrical parameters of lymphocyte membranes deduced from impedance spectroscopy altered by surface roughness and microvillosity?
C. Cametti and F. de Luca (Rome, Italy), M.A. Macri' (Chieti, Italy), B. Maraviglia, G. Zimatore, F. Bordi, R. Misasi, M. Sorice, L. Lenti and A. Pavan (Rome, Italy) 309

Brief Note

The effect of subphase chemical composition on the morphology of bacteriorhodopsin monolayers
B.F. Li, Y.C. Song, J.R. Li, J.A. Tang and L. Jiang (Beijing, People's Republic of China) 317

Vol. 3 No. 6

Structural study of AOT reverse micelles containing native or modified proteins: influence of surfactant–enzyme interaction
M.P. Pileni, G. Cassin, F. Michel and F. Pitré (Paris, France) 321
An image analysis strategy to study cell adhesion
S. Lahooti, H.K. Yueh and A.W. Neumann (Toronto, Ont., Canada) 333
Adhesion of filamentous microbial cells on paper covered with ionic polymers by radiation polymerization
L. Zhaoxin (Nanjing, China) and M. Kumakura (Yamanashi, Japan) 343
Competitive adsorption of L-α-lysophosphatidylcholine/β-lactoglobulin mixtures at the interfaces of foams and foam lamellae
D.K. Sarker, P.J. Wilde and D.C. Clark (Norwich, UK) 349
Comparative kinetics of phospholipase A_2 action on liposomes and monolayers of phosphatidylcholine spread at the air–water interface
V. Raneva and Tz. Ivanova (Sofia, Bulgaria), R. Verger (Marseille, France) and I. Panaiotov (Sofia, Bulgaria) 357
Ellipsometry studies of fibronectin adsorption
M. Malmsten (Stockholm, Sweden) 371
